Infrastructure Enhancement

Faster and Smoother!

We've been working on fixing some of the critical bugs that have caused system overload and therefore affected the user experience. Improvements have been added for both the server and client side, and now allow faster & smoother work with an overall better user experience.

Demand Collector

New Providers Added:

- ▶ Creative Clicks, Yep Media & WebEye
- ▶ All three are available to all networks

Redirect – Autofill Events

- ▶ Redirect definition for all events
- ▶ Choose one reason type that will be applied to all events

The screenshot shows the 'Configuration Tools > Global Redirect > General Settings' page. On the left, there is a table with columns for 'Event', 'Response Type', and 'Active'. The 'Autofill Events' row is checked and active. On the right, a 'Global Redirect' panel shows a dropdown menu for 'Event:' with 'Autofill Events' selected and highlighted by a black arrow.

Event	Response Type	Active
<input checked="" type="checkbox"/> Autofill Events	404	●
<input type="checkbox"/> Offer Not Found	Redirect URL	●
<input type="checkbox"/> Offer Not Active	Redirect URL	●
<input type="checkbox"/> Affiliate Not Allowed ...	Redirect URL	●
<input type="checkbox"/> OS Targeting Not Met	Redirect URL	●
<input type="checkbox"/> Geo Targeting Not Met	Redirect URL	●
<input type="checkbox"/> Device Type Not Met	Redirect URL	●

In Addition
